Developing Number Concepts
3 Part Series and Guide
by Kathy Richardson | Grades: K-3

These clearly written books present a complete number curriculum for kindergarten through third grade classrooms. Each book provides simple but meaningful activities to give students repeated math experiences. The books present an approach based on years of research by the author on how children learn. They are a must for all K-3 teachers of mathematics who aspire to meet the needs of every one of their students.

Each chapter of each book includes:
- What you need to know about…
- Chapter Overview
- Goals for Children’s Learning
- Analyzing and Assessing Children’s Needs
- Classroom Scenes
- About the Activities
- Teacher Directed Activities
- Independent Activities
- Blackline Masters
